

Greater Norwich Local Plan – Strategic Flood Risk Assessment (SFRA)

The appendices to the SFRA are available on the links below. Many of these are maps. To help you find what you are looking for, the contents are described below.

Appendix A: this is a series of maps showing all sources of flood risk. Open the 'index' map to locate the area within Greater Norwich you are interested in, and note the reference of the inset map – then find the link to that inset map from the main list.

You can turn the map content on and off by clicking on the boxes in the legend. If you need more information about the maps in Appendix A, you can find this in Appendix D.

Appendix B: The maps in this section are not 'interactive' and the title explains the content of each: Internal Drainage Boards, main rivers and ordinary water courses by district.

Appendix C: The maps in this section show flood alert and flood warning areas. There is no index for these maps.
