

1b. I am... - Planning Consultant

**1c. Client / Landowner Details (if different from your login account)**

Title Mr

First Name Frank

Last Name Spurgeon

Organisation (where relevant)

Address

Post Code

Telephone Number

Email Address

**2. Site Details**

Site location / address and post code.

(at the end of this form you will be able to plot the site on a map as part of your submission)

Land North of High Green (Doctors Field), Brooke, NR15 1JD

Site area (hectares) 1.92 Ha

Please upload a red line plan showing your site boundaries or use the interactive map at the end of this process. [10-01 SITE A \(REVA\).pdf](#)

**3. Site Ownership**

3a. I (or my client)... Is the sole owner of the site

3b. Please provide the name, address and contact details of the site's landowner(s)

As client details above.

3c. If the site is in multiple landownerships do all landowners support your proposal for the site? Yes

**4. Current and Historic Land Uses**

4a. Current Land Use (Please describe the site's current land use e.g. agriculture, employment, unused/vacant etc.)

Currently agricultural land, used as arable land.

4b. Has the site been previously developed? No

4c. Describe any previous uses of the site. (please provide details of any relevant historic planning applications, including application numbers if known)

Historically used for agricultural purposes.

## **5. Proposed Future Uses**

### **5a. Please provide a short description of the development or land use you proposed (if you are proposing a site to be designated as local green space please go directly to question 6)**

Proposed residential development of up to 25 dwellings including both market and affordable housing to meet local housing need in the parish and adjoining parish's.

### **5b. Which of the following use or uses are you proposing?**

- Market Housing

- Affordable Housing

### **5c. Please provide further details of your proposal, including details on number of houses and proposed floorspace of commercial buildings etc.**

Residential development of up to 25 dwellings including market and affordable housing, associated access and footpath extension along High Green. Residential development to comprise a mix of size, type and tenure of dwellings. A range of 1, 2, 3 and 4 bedroom dwellings would be provided including single and two storey dwellings. The indicative masterplan attached to this submission sets out a detailed layout for the site and shows the variety of house types and sizes proposed. The masterplan also includes for the provision of a footpath connection northeast along High Green to connect the site to the village centre and amenities.

### **5d. Please describe any benefits to the Local Area that the development of the site could provide.**

The residential development would seek to address local housing need in the parish and if necessary adjoining parishes. The proposed development of this scale would provide significant social and economic benefits to the village, surrounding community and local businesses through supporting the local services and facilities, whilst also being of sufficient scale to provide affordable housing. Support and increased demand for places at the nearby Primary School, and increased household spend in local businesses including the nearby public houses, café, the Brook Garage, and veterinary surgery. Increased demand for local bus services through the village would assist in their ongoing viability and sustainability. Subsequent economic multiplier effects of additional household spend being recirculated through the local economy on other services and facilities, for maintenance, building, gardening, childcare, cleaning. The generation of labour in the short term through construction and in the longer term through generating additional need for services in the area, builders, plumbers, gardeners childminders etc. Socially the proposals would provide for increased housing supply, and offer a mix of type, size and tenure of dwellings addressing the local need for housing.

Whilst submitted as a stand alone site offering potential for up to 25 dwellings the site can also be considered alongside the adjacent site to the west also submitted and in the same ownership. Together they provide an opportunity to combine the necessary growth of the village with the provision of a new single form entry primary school. Such an opportunity represents a very substantial benefit to the village and surrounding community. Clearly a significant amount of financial assistance is needed to deliver such a site and necessary facilities. The provision of smaller sites will also not be able individually or cumulatively deliver enhanced primary school provision. Other large sites put forward as available within or adjacent to Brooke have been identified as having significant adverse impacts on the historic character and form of the village. This site represents a sensitive continuation of the predominant east west axis of the village along High Green. In not extending further north than the existing settlement to the east and no further west than the nearby farm complex the proposals would avoid harmful intrusion into the open countryside and be sympathetic with the slender ribbon character and grain of the village that flows east to west.

## **6. Local Green Space**

If you are proposing a site to be designated as Local Green Space please complete the following questions. These questions do not need to be completed if you are not proposing a site as Local Green Space. Please consult the guidance notes for an explanation of Local Green Space Designations.

## **7. Site Features and Constraints**

Are there any features of the site or limitations that may constrain development on this site (please give details)?

### **7a. Site Access: Is there a current means of access to the site from the public highway, does this access need to be improved before development can take place and are there any public rights of way that cross or adjoin the site?**

A new vehicular access on to High Green would be required and this has been shown on the submitted masterplan. Visibility splays could be provided within the site owners control appropriate for a 30 mph speed restricted zone. Speed restriction could be extended further westwards along High Green and secured via legal agreement or conditions as part of development of the site if required. The proposals include the provision of a 1.2-1.5 metre wide footpath along the north side of High Green to link into the existing 1.4 metre wide footpath that finishes just south of the junction with Astley Cooper Place.

### **7b. Topography: Are there any slopes or significant changes of in levels that could affect the development of the site?**

The site is a relatively flat and open agricultural field. Not a constraint on development.

### **7c. Ground Conditions: Are ground conditions on the site stable? Are there potential ground contamination issues?**

The site is an open field with no known stability issues. The site has historically been used for agriculture as open arable land and therefore no known contamination issues.

### **7d. Flood Risk: Is the site liable to river, ground water or surface water flooding and if so what is the nature, source and frequency of the flooding?**

The site is not located within Flood Zones 2 and 3 and is at very low risk (less than 0.1%) of surface water flooding as identified on the Environment Agency flood risk maps. There is nothing to indicate that a relatively standard approach to landscaping and SUDS techniques would not be able to mitigate for any potential off-site impacts of development and minimise risk on site.

### **7e. Legal Issues: Is there land in third party ownership, or access rights, which must be acquired to develop the site, do any restrictive covenants exist, are there any existing tenancies?**

There are no known legal issues.

### **7f. Environmental Issues: Is the site located next to a watercourse or mature woodland, are there any significant trees or hedgerows crossing or bordering the site are there any known features of ecological or geological importance on or adjacent to the site?**

The site does not contain and is not within any statutory or non-statutorily protected sites. Nor does the site contain any priority habitats. The site is also not adjacent to or within close proximity to any statutorily and non-statutorily protected sites. The nearest protected site is the Shotesham Woodton Hornbeam Woods SSSI located in excess of 2.3kms to the southwest. The site is within an area identified as being important for the following priority species, Lapwing, Turtle Dove, Grey Partridge, Curlew and Tree Sparrow.

### **7g. Heritage Issues: Are there any listed buildings, Conservation Areas, Historic Parklands or Schedules Monuments on the site or nearby? If so, how might the site's development affect them?**

The site does not include any designated or undesignated heritage assets. The grade II listed thatched cottage at 66 High Green is located adjacent to the south east of the site. Much of its historic character and setting has been eroded

by modern development to the north and to either side, and its current setting and context is now characterised by dwellings fronting High Green, in ribbon pattern and generally setback in mature landscaped gardens. The indicative masterplan has responded to the sensitivity of the dwelling by creating landscaped space and area of planting adjacent to this dwelling. Given the intervening vegetation and surrounding buildings along High Green subject to appropriate height, scale and design of development this would not be a constraint on development.

The Brooke Conservation Area is also located immediately to the east of the site. Given the surrounding context of the conservation area, the existence of residential development adjoining the conservation area to the north, south and west and intervening vegetation, development of the site would not impact on important views into and out of the conservation area. It is noted that the village has continued to grow to a limited degree westwards along High Green and subject to sensitive scale, height and design of buildings and landscaping of the site, this would not be a constraint on development of the site.

**7h. Neighbouring Uses: What are the neighbouring uses and will either the proposed use or neighbouring uses have any implications?**

The site adjoins agricultural fields to the north and south and to the east. Wood Farm is located to the west of the site. Residential properties fronting High Green are located to the east and west of the site.

**7i. Existing uses and Buildings: are there any existing buildings or uses that need to be relocated before the site can be developed.**

The site is a clear and open field last used for agricultural purposes. No buildings or structures to be removed.

**8. Utilities**

**8a. Which of the following are likely to be readily available to service the site and enable its development? Please provide details where possible.**

<b>Mains water supply</b>	Yes
<b>Mains sewerage</b>	Yes
<b>Electricity supply</b>	Yes
<b>Gas supply</b>	No
<b>Public highway</b>	Yes
<b>Broadband internet</b>	Yes

**9. Availability**

**9a. Please indicate when the site could be made available for the land use or development proposed.** Immediately

**9b. Please give reasons for the answer given above.**

The site is in the full ownership and control of the applicant. There are no known legal, viability, environmental or technical constraints and obstacles that cannot be overcome. The land is therefore available and ready to commence in the short term.

**10. Market Interest**

**10. Please choose the most appropriate category below to indicate what level of**

market interest there is/has been in the site. Please include relevant dates in the comments section. None

## 11. Delivery

11a. Please indicate when you anticipate the proposed development could be begun. Up to 5 years (by April 2021)

11b. Once started, how many years do you think it would take to complete the proposed development (if known)? 2-3 years

## 12. Viability

This is the description of your section break.

12a. You acknowledge that there are likely to be policy requirements and Community Infrastructure Levy (CIL) costs to be met which will be in addition to the other development costs of the site (depending on the type and scale of land use proposed). These requirements are likely to include but are not limited to: Affordable Housing; Sports Pitches & Children's Play Space and Community Infrastructure Levy - I agree

12b. Do you know if there are there any abnormal costs that could affect the viability of the site e.g. infrastructure, demolition or ground conditions? No

### 12c. If there are abnormal costs associated with the site please provide details:

The cost implications of needing to provide a footpath connection to the existing footpath along High Green has been considered and is reflected in the number of dwellings proposed in this submission and the supporting masterplan for the site which demonstrates provision of footpath link.

12d. Do you consider that the site is currently viable for its proposed use taking into account any and all current planning policy and CIL considerations and other abnormal development costs associated with the site? Yes

## 13. Other Relevant Information

### 14. Declaration

I understand that:

Data Protection and Freedom of Information

The Data Controller of this information under the Data Protection Act 1998 will be Norfolk County Council, which will

hold the data on behalf of Broadland District Council, Norwich City Council and South Norfolk District Council. The purposes of collecting this data are:

- to assist in the preparation of the Greater Norwich Local Plan
- to contact you, if necessary, regarding the answers given in your form
- to evaluate the development potential of the submitted site for the uses proposed within the form

Disclaimer

The Site Submission response forms received as part of the Greater Norwich Local Plan Regulation 18 Consultation will be published and made available for public viewing. By submitting this form you are consenting to the details about you and your individual sites being stored by Norfolk County Council, and the details being published for consultation purposes. Any information you consider to be confidential is clearly marked in the submitted response form and you have confirmed with the Council(s) in advance that such information can be kept confidential as instructed in the Greater Norwich Local Plan: Regulation 18 "Growth Options" Consultation - Site Submission Guidance Notes.

I agree that the details within this form can be held by Norfolk County Council and that those details can be shared with Broadland District Council, Norwich City Council and South Norfolk District Council for the purposes specified in this declaration.
