Appendix B	Existing Records	UK Power Networks
Appendix C	Existing Records	Anglian Water (Potable)
Appendix D	Existing Records	Anglian Water (Sewers)
Appendix E	Existing Records	BT

## 1. INTRODUCTION

- 1.1. Richard Jackson Ltd has been instructed by Mrs E Peplow to undertake a foul sewage and utilities assessment to support a planning allocation on land at Taverham Road, Drayton, located to the west of Drayton, for the purposes of a feasibility study for approximately 70 dwellings.
- 1.2. The site is located on the land between Taverham Road and Costessey Lane. To the south of the site is Costessey Lane and beyond that agricultural fields and the River Wensum. To the east of the site, there is a small field and dwellings fronting Station Road. To the north beyond Taverham Road there are residential housing estates for Drayton. The Site is mainly vacant land, used for some agriculture.
- 1.3. **Figure 1** illustrates the location and extent of the proposed site, equating to a developable area of approximately 3.2ha. This site has an approximate Ordnance Survey midpoint of 617500E, 313350N and Postcode NR8 6RY.
- 1.4. The sites' topography is such that the highest point is along the northern boundary and it falls in a southerly direction. The high point is at about 21m Above Ordnance Datum (AOD) and the southern boundary is at about 8.5m AOD.
- 1.5. The copyright of this report is vested in Richard Jackson Ltd. The client or its appointed representative may copy this report in connection with the development described herein. However, it should be noted that this report shall not be copied or distributed in any other form by any other party or used for any other purpose without the written consent of Richard Jackson Ltd.

## 2. EXISTING UTILITIES

2.1. To enable an assessment into existing mains utilities apparatus located on and around the immediate vicinity of the site, mains records plans were collated from the client records of the relevant statutory utility companies. The table below provides a summary of the responses received from the companies data provided:

**Table 2.1 – Existing Statutory Utility Providers**

Company	Plant Present	Plant Affected
Energetics	No	No
UK Power Networks	Yes	Unlikely
Cadent Gas Ltd	Yes	Only for connection
GTC	No	No
Anglian Water (Foul)	Yes	Only for connection
Anglian Water (Potable)	Yes	No
Transmitters	No	No
Mast Data	No	No
CityFibre	No	No
euNetworks	No	No
BT	Yes	No
BSKYB	No	No
Virgin Media	No	No
Vodafone (Ex Cables & Wireless)	No	No
Logica	No	No
Colt	No	No
Instalcom Limited	No	No
KPN	No	No
SOTA	No	No
TATA	No	No
Vtesse	No	No
Verizon Business	No	No
Interoute	No	No
KCOM	No	No
Trafficmaster	No	No
Network Rail	No	No

2.2. To identify the main services, a brief description of each company's apparatus is indicated below. Where the apparatus is affected, the records are located in the attached appendices. Note the records plans obtained from the statutory utilities typically show approximate routes of mains only, not service cables, ducts or pipes, or private services which are unrecorded and appropriate precautions to identify utility infrastructure should always be undertaken prior to any excavating operations.

## Gas

- 2.3. The local mains gas distribution network is operated by Cadent Gas Ltd. Cadent Gas Ltd mains records, provided in **Appendix A**, indicate that in the immediate vicinity of the site there are numerous low pressure mains which act as the gas distribution network.
- 2.4. In the vicinity of the proposed access to the site, there is a 2" ST Low pressure main, which appears to be either in the footway or the southern side of Taverham Road, this changes to a 4" ST main to the west in the vicinity of the junction of Taverham Road/Orchard Bank. In the northern side of Taverham Road there is an 8" SI low pressure main also. Additionally, there are no known mains within the site boundary according to the record plans.
- 2.5. To the south of the site, there is also a 6" ST Low pressure main in the northern side of Costessey Lane and/or in the northern verge. Finally, there are numerous additional mains in the surrounding roads around the site.

## UK Power Networks

- 2.6. The existing electrical distribution network is operated by Eastern Power Networks Plc, trading as UK Power Networks. Mains records plans provided in **Appendix B** indicate that UK Power Networks has electrical plant on and in the vicinity of the site.
- 2.7. The records show that there are high voltage overhead cables present within the site boundary. The poles for the cables are located in the south western corner of the site and along the western boundary. These cables are grounded to the rear of 67 Taverham Road. These cables will need to be grounded or incorporated into the development layout, with appropriate easements provided.
- 2.8. In the vicinity of the proposed access there are two underground cables in the southern footway along Taverham Road. One is high voltage, and the other low voltage, with the high voltage cable being the most southern. The low voltage cable crosses to the northern side of Taverham Road at the proposed access location, and may require diverting or lowering. The high voltage cable crosses to the northern side further east, and this may require lowering in the vicinity of the proposed access.
- 2.9. According to the plans no cables are present along the southern boundary with Costessey Lane.

## Street Lighting

- 2.10. Internet mapping indicates that there isn't any street lighting that is located on Taverham Road where the proposed access is located. If any lighting columns need to be relocated, then £1,000 should be budgeted for one column relocation.

### **Anglian Water (Potable)**

- 2.11. Potable water mains records, provided in **Appendix C**, indicate that Anglian Water has 3" GI main located in the southern side of Taverham Road. This should not be affected by the development, however, confirmation from Anglian Water will be required, especially in the vicinity of the proposed access.
- 2.12. In the vicinity of the proposed access, there is a 3" GI main which travels east west, within the vicinity of the footway along Taverham Road. There is also a hydrant located just to the west of the proposed access.
- 2.13. There are also numerous potable water mains within the surrounding roads of the site, however, the record plans do not show a potable water main in Costessey Lane.

### **Anglian Water (Sewers)**

- 2.14. Sewer records, provided in **Appendix D**, indicate that Anglian Water has assets within Taverham Road. The foul water sewers are located in the northern side of Taverham Road and flow eastwards until Station Road, where they begin flowing southwards. The sewers in Taverham Road are of unknown material and diameter, and therefore, this will need to be confirmed with Anglian Water, however, the downstream sewerage just west of Low Road indicates the sewer diameter as 150mm, which is the likely diameter of the Taverham Road sewers.
- 2.15. Foul water sewers are only present in Costessey Lane at the junction with Station Road where they flow eastwards towards the pumping station west of Low Road.
- 2.16. The nearest surface water sewers are located approximately 350m east of the site along Marriots Way, and appear to discharge into a contributory of the River Wensum. The record plans do not shown any surface water sewers in Taverham Road or Costessey Lane.
- 2.17. Internet mapping indicates that a road gully is present in the vicinity of the access, this will likely require removal and new gullies being placed within Taverham Road, however, this is subject to finalised access location and highways surface water strategy.

### **BT**

- 2.18. BT mains records, provided in **Appendix E**, indicate that telecoms apparatus is present in Taverham Road and Costessey Lane.
- 2.19. These records show existing underground duct and chambers in the Southern footway of Taverham Road. There appears to be a chamber within the vicinity of the proposed access that may require diverting, and the cables connecting to it, may also require lowering where the proposed access road would be built.
- 2.20. There is also underground apparatus in Costessey Lane that serves the Care Home to the west of the site, which also continue towards the Timber yard

just west of the site. Some of these cables are close to the southern boundary of the site, but are unlikely to affect the development of the land.

- 2.21. A speculative search using BT's online Broadband Availability Checker (which gives an initial indication of the availability of broadband services for a particular phone line or postcode) has been performed using the postcode NR8 6RY. The search output shown in **Appendix E** indicates that Unlimited Broadband is available. Standard broadband connection delivers a downstream line rate of a minimum of 3 Mbps with a typical downstream range between 6.5 and 14.0 Mbps. It should be noted however that these figures are indicative and the most accurate results can be obtained from a telephone number check.

### 3. PROPOSED UTILITY CONNECTIONS

- 3.1. Although the above statutory utilities mentioned in Chapter 2 have been consulted, not all connection requests and costings have been obtained. Whether third parties have or have not been consulted or costings received or not, for the proposed development of approximately 70 dwellings, this section outlines the likelihood of the site being suitably served for all statutory utility connections.
- 3.2. Using all of the information supplied by the statutory utility companies and the local information where available the site has been considered for connection to the following main service providers. These included Cadent Gas Ltd, UK Power Networks, Anglian Water and BT. The following **Table 3.1** provides information on the likely connections where not fully known.

**Table 3.1 – Utility connection Summary**

Utility Company	Disconnection Costs	Diversions	Infrastructure & Connection point
Gas	N/A	Gas main in footway at access point, diversion possible at new entrance	No likely offsite connection upgrades as gas main next to site
Electric	N/A	Overhead cables may need to be diverted in southwest corner of the site, but more likely to be incorporated into the design in Public Open Space area	Connection to the local network, very likely, with low and high voltage cables in Taverham Road which could be used for connection purposes
Street Lighting	£1,000.00 (if required)	Unlikely	-
Potable Water	N/A	N/A	Water main at edge of site with capacity likely to serve the development
Foul Water disposal	N/A	N/A	Foul sewer is located in Taverham Road. The site will require a pumping station with a cordon sanitaire of 15m around pumping station – likely cost £150,000, with connection to Taverham Road or to Costessey Lane.
Telecoms	N/A	N/A	N/A

- 3.3. The disposal of surface water appears feasible through infiltration techniques and is likely to be accommodated on the site, without the need for a connection to the local surface water sewer network.

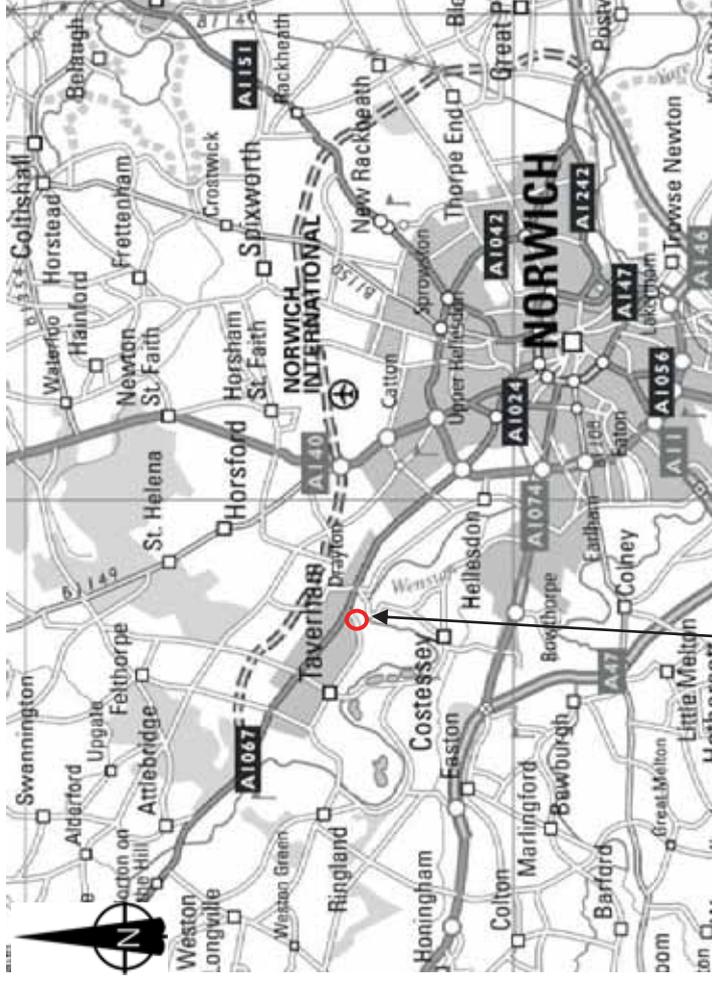

#### **4. CONCLUSIONS**

- 4.1. It has been demonstrated that there are existing services locally, some of which are across the site, but these are likely to be accommodated within the proposed development area or public open space/green areas on the site.
- 4.2. Where necessary, any existing services that are crossing the site can be diverted if necessary and dealt with appropriately and thus do not prevent the site from being developed.
- 4.3. A brief overview of the proposed services indicates that the location of existing services are likely to be deliverable for new connections to be made and to adequately serve the proposed development of approximately 70 dwellings.
- 4.4. A foul water pumping station is likely for the site which can be accommodated within the site boundary. A rising main will be required to Taverham Road or to sewers in Costessey Lane.

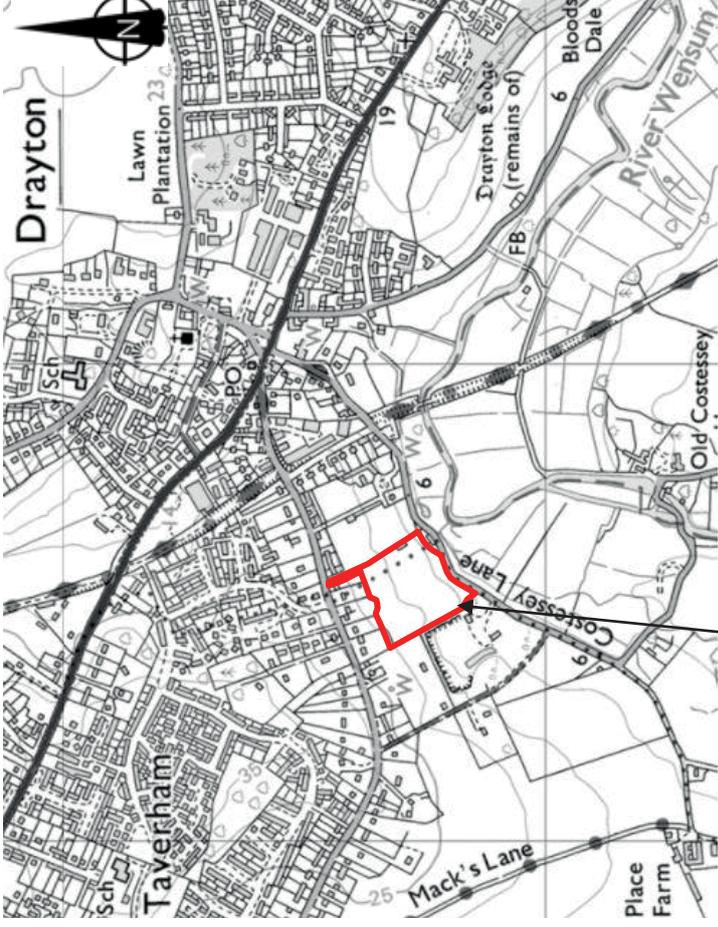

#### **5. LIMITATIONS**

- 5.1. This report has been produced for the sole use of Mrs E Peplow as outlined above in **Section 1**.
- 5.2. The contents of this report should not be relied upon by others without the written authority of Richard Jackson Ltd. If any unauthorised third party makes use of this report, they do so at their own risk and Richard Jackson Ltd owes them no duty of care or skill. All information provided by others is taken in good faith as being accurate, however Richard Jackson Ltd cannot, and does not, accept any liability for the detailed accuracy, errors or omissions in such information.
- 5.3. No evidence of other utility apparatus has been provided by the client. Note that the records plans obtained from the statutory utilities typically show approximate routes of mains apparatus only, not service cables, ducts, or pipes, which are unrecorded. This assessment also does not rule out the potential for further private services to exist and usual searches and precautions should be undertaken when carrying out any excavation or probing work. Therefore, a check must be undertaken when carrying out any work beneath the ground, prior to any excavation taking place.

MAPS Viewer Version 5.8.0.1

Local Machine

This plan is reproduced from or based on the OS map by Cadent Gas Ltd, with the sanction of the controller of HM Stationery Office. Crown Copyright Reserved.

This plan shows those pipes owned by Cadent Gas Ltd in their role as a Licensed Gas Transporter (GT). Gas pipes owned by other GTs, or otherwise privately owned, may be present in this area. Information with regard to such pipes should be obtained from the relevant owners. The information shown on this plan is given without warranty, the accuracy thereof cannot be guaranteed. Service pipes, valves, syphons, stub connections, etc. are not shown but their presence should be anticipated. No liability of any kind whatsoever is accepted by Cadent Gas Ltd or their agents, servants or contractors for any error or omission. Safe digging practices, in accordance with HS(G)47, must be used to verify and establish the actual position of mains, pipes, services and other apparatus on site before any mechanical plant is used. It is your responsibility to ensure that this information is provided to all persons (either direct labour or contractors) working for you on or near gas apparatus. The information included on this plan should not be referred to beyond a period of 28 days from the date of issue. Further information on all DR4s can be determined by calling the DR4 hotline on 01455 892426 (9am-5pm) A DR4 is where a potential error has been identified within the asset record and a process is currently underway to investigate and resolve the error as appropriate.

## Appendix B

Our Ref: 12327806      Your Ref: 48749

Wednesday, 28 February 2018

Duncan Phillips  
91 Market Street  
Hoylake  
Merseyside  
CH47 5AA

Dear Duncan Phillips

Thank you for contacting us regarding UK Power Networks equipment at the above site. I have enclosed a copy of our records which show the electrical lines and/or electrical plant. I hope you find the information useful.

I have also enclosed a fact sheet which contains important information regarding the use of our plans and working around our equipment. Safety around our equipment is our number one priority so please ensure you have completed all workplace risk assessments before you begin any works.

Should your excavation affect our Extra High Voltage equipment (6.6 KV, 22 KV, 33 KV or 132 KV), please contact us to obtain a copy of the primary route drawings and associated cross sections.

If you have any further queries do not hesitate to contact us.

Plan Provision  
0800 056 5866

This information is made available to you on the terms set out below. If you do not accept the terms of use set out in this fact sheet please do not use the plans and return them to UK Power Networks.

1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk.
2. UK Power Networks does not exclude or limit its liability if it causes the death of any person or causes personal injury to a person where such death or personal injury is caused by its negligence.
3. Subject to paragraph 2 UK Power Networks has no liability to you in contract, in tort (including negligence), for breach of statutory duty or otherwise how for any loss, damage, costs, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential loss or damage whatsoever.
4. The information about UK Power Networks electrical plant and/or electric lines provided to you belongs to and remains the property of UK Power Networks. You must not alter it in any respect.
5. The information provided to you about the electrical plant and/or electric lines depicted on the plans may NOT be a complete record of such apparatus belonging to UK Power Networks. The information provided relates to electric lines and/or electrical plant belonging to UK Power Networks that it believes to be present but the plans are not definitive: other electric lines and/or electrical plant may be present and that may or may not belong to UK Power Networks.
6. Other apparatus not belonging to UK Power Networks is not shown on the plan. It is your responsibility to make your own enquiries elsewhere to discover whether apparatus belonging to others is present. It would be prudent to assume that other apparatus is present.
7. You are responsible for ensuring that the information made available to you is passed to those acting on your behalf and that all such persons are made aware of the contents of this letter.
8. Because the information provided to you may not be accurate, you are recommended to ascertain the presence of UK Power Networks electric lines and/or electrical plant by the digging of trial holes. Trial holes should be dug by hand only.

Excavations must be carried out in line with the Health and Safety Executive guidance document HSG 47. We will not undertake this work. A copy of HSG 47 can be obtained from the Health and Safety Executives website.

All electric lines discovered must be considered LIVE and DANGEROUS at all times and must not be cut, resited, suspended, bent or interfered with unless specially authorised by UK Power Networks.

The electric line and electrical plant belonging to UK Power Networks remains so even when made dead and abandoned and any such electric line and/or electrical plant exposed shall be reported to UK Power Networks.

Where your works are likely to affect our electric lines and/or electrical plant an estimate of the price of any protective /diversionary works can be prepared by UK Power Networks Branch at Metropolitan House, Darkes Lane, Potters Bar, Herts. , EN6 1AG, telephone no. 0845 2340040

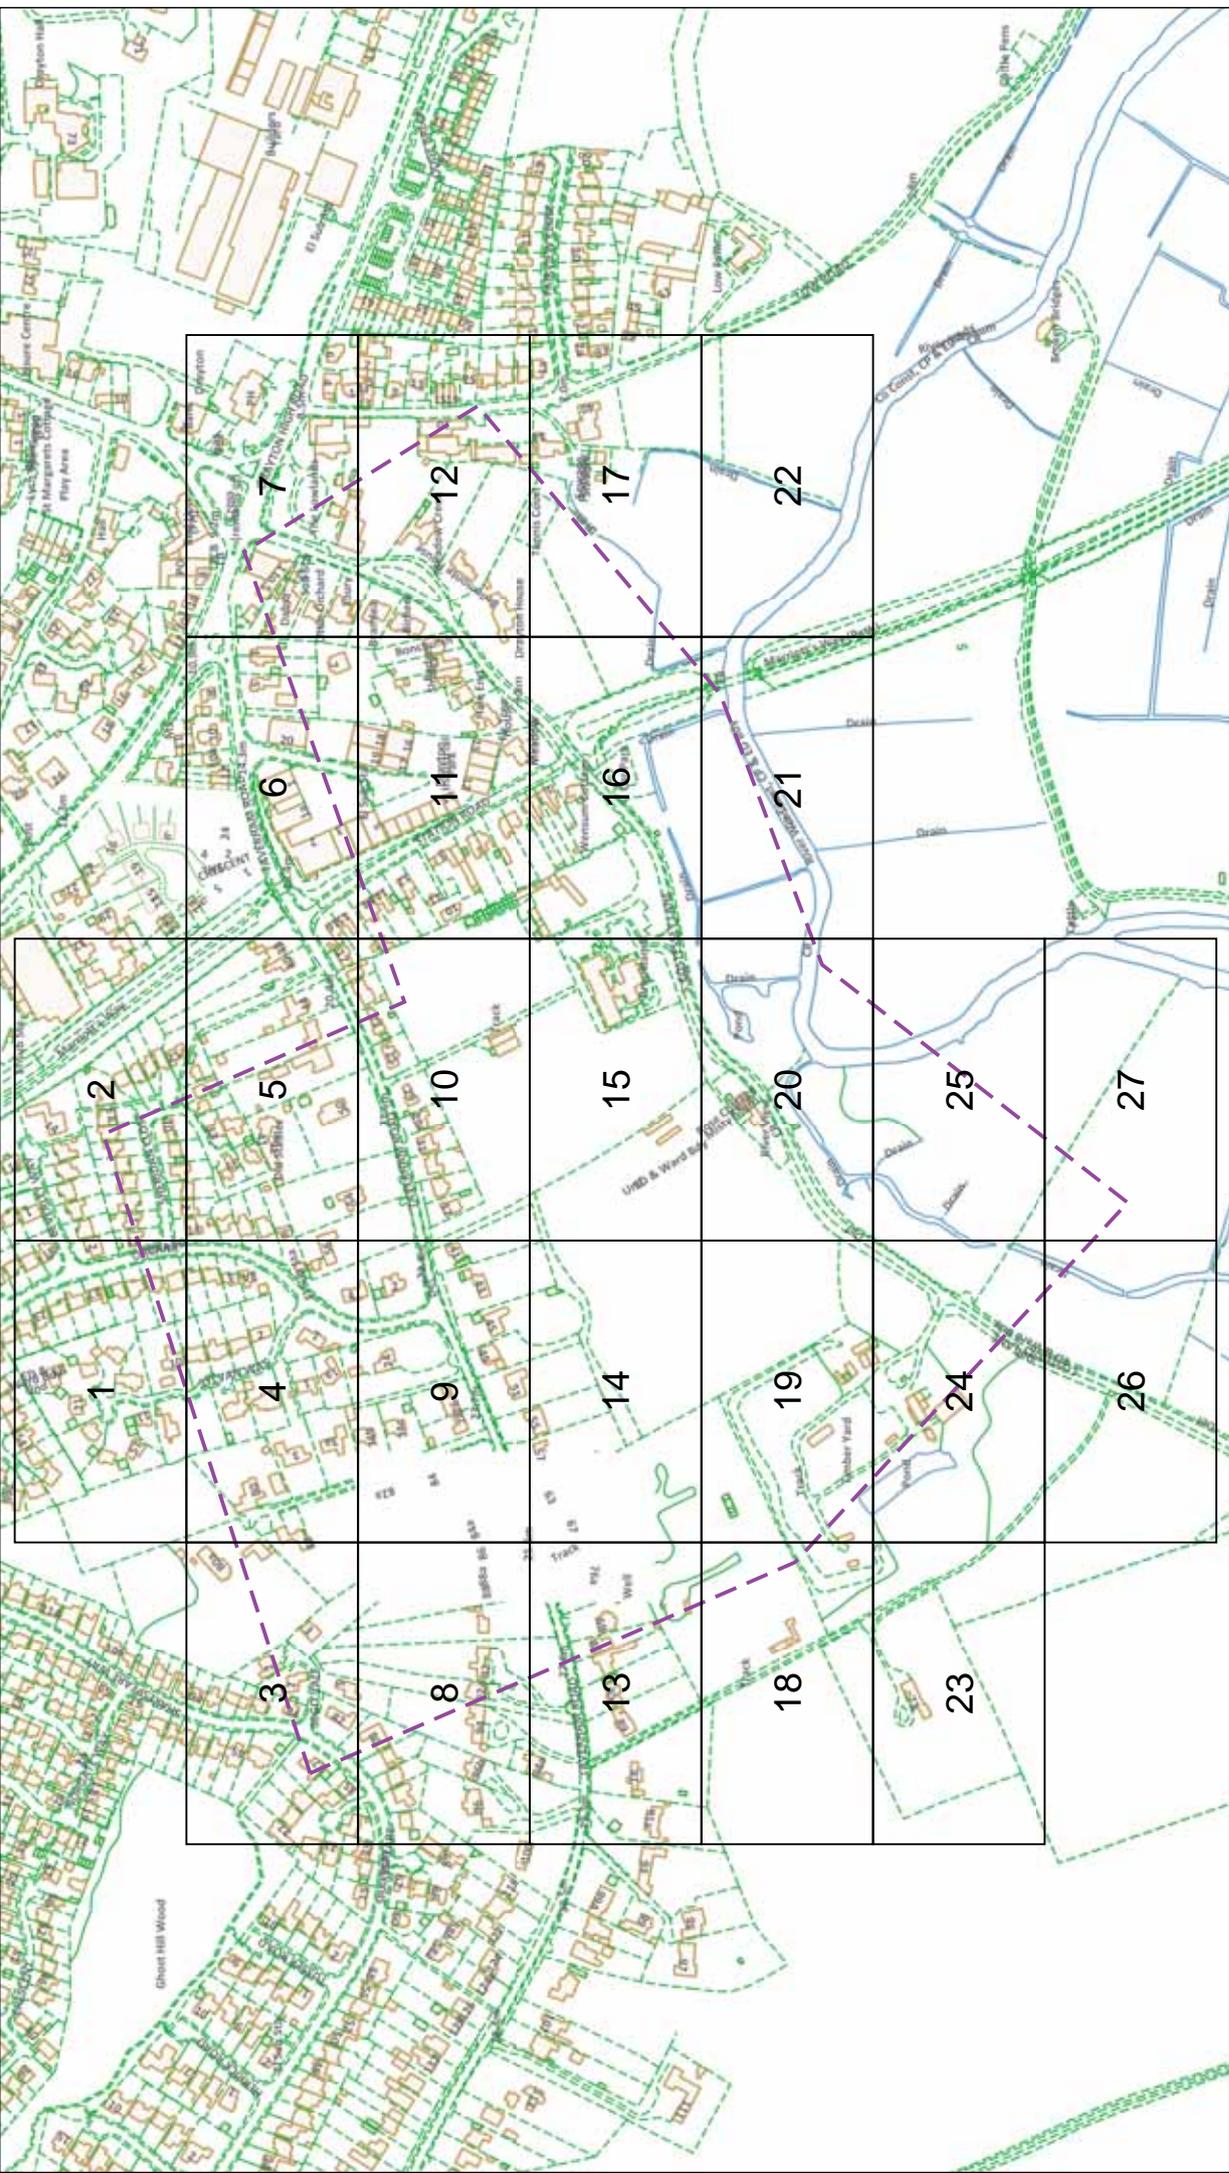

- 9 Any work near to any overhead electricity lines must be carried out by you in accordance with the Health and Safety Executive guidance document GS6 and the Electricity at Work Regulations.

The GS6 Recommendations may be purchased from HSE Books or downloaded from the Energy Networks Association's website.

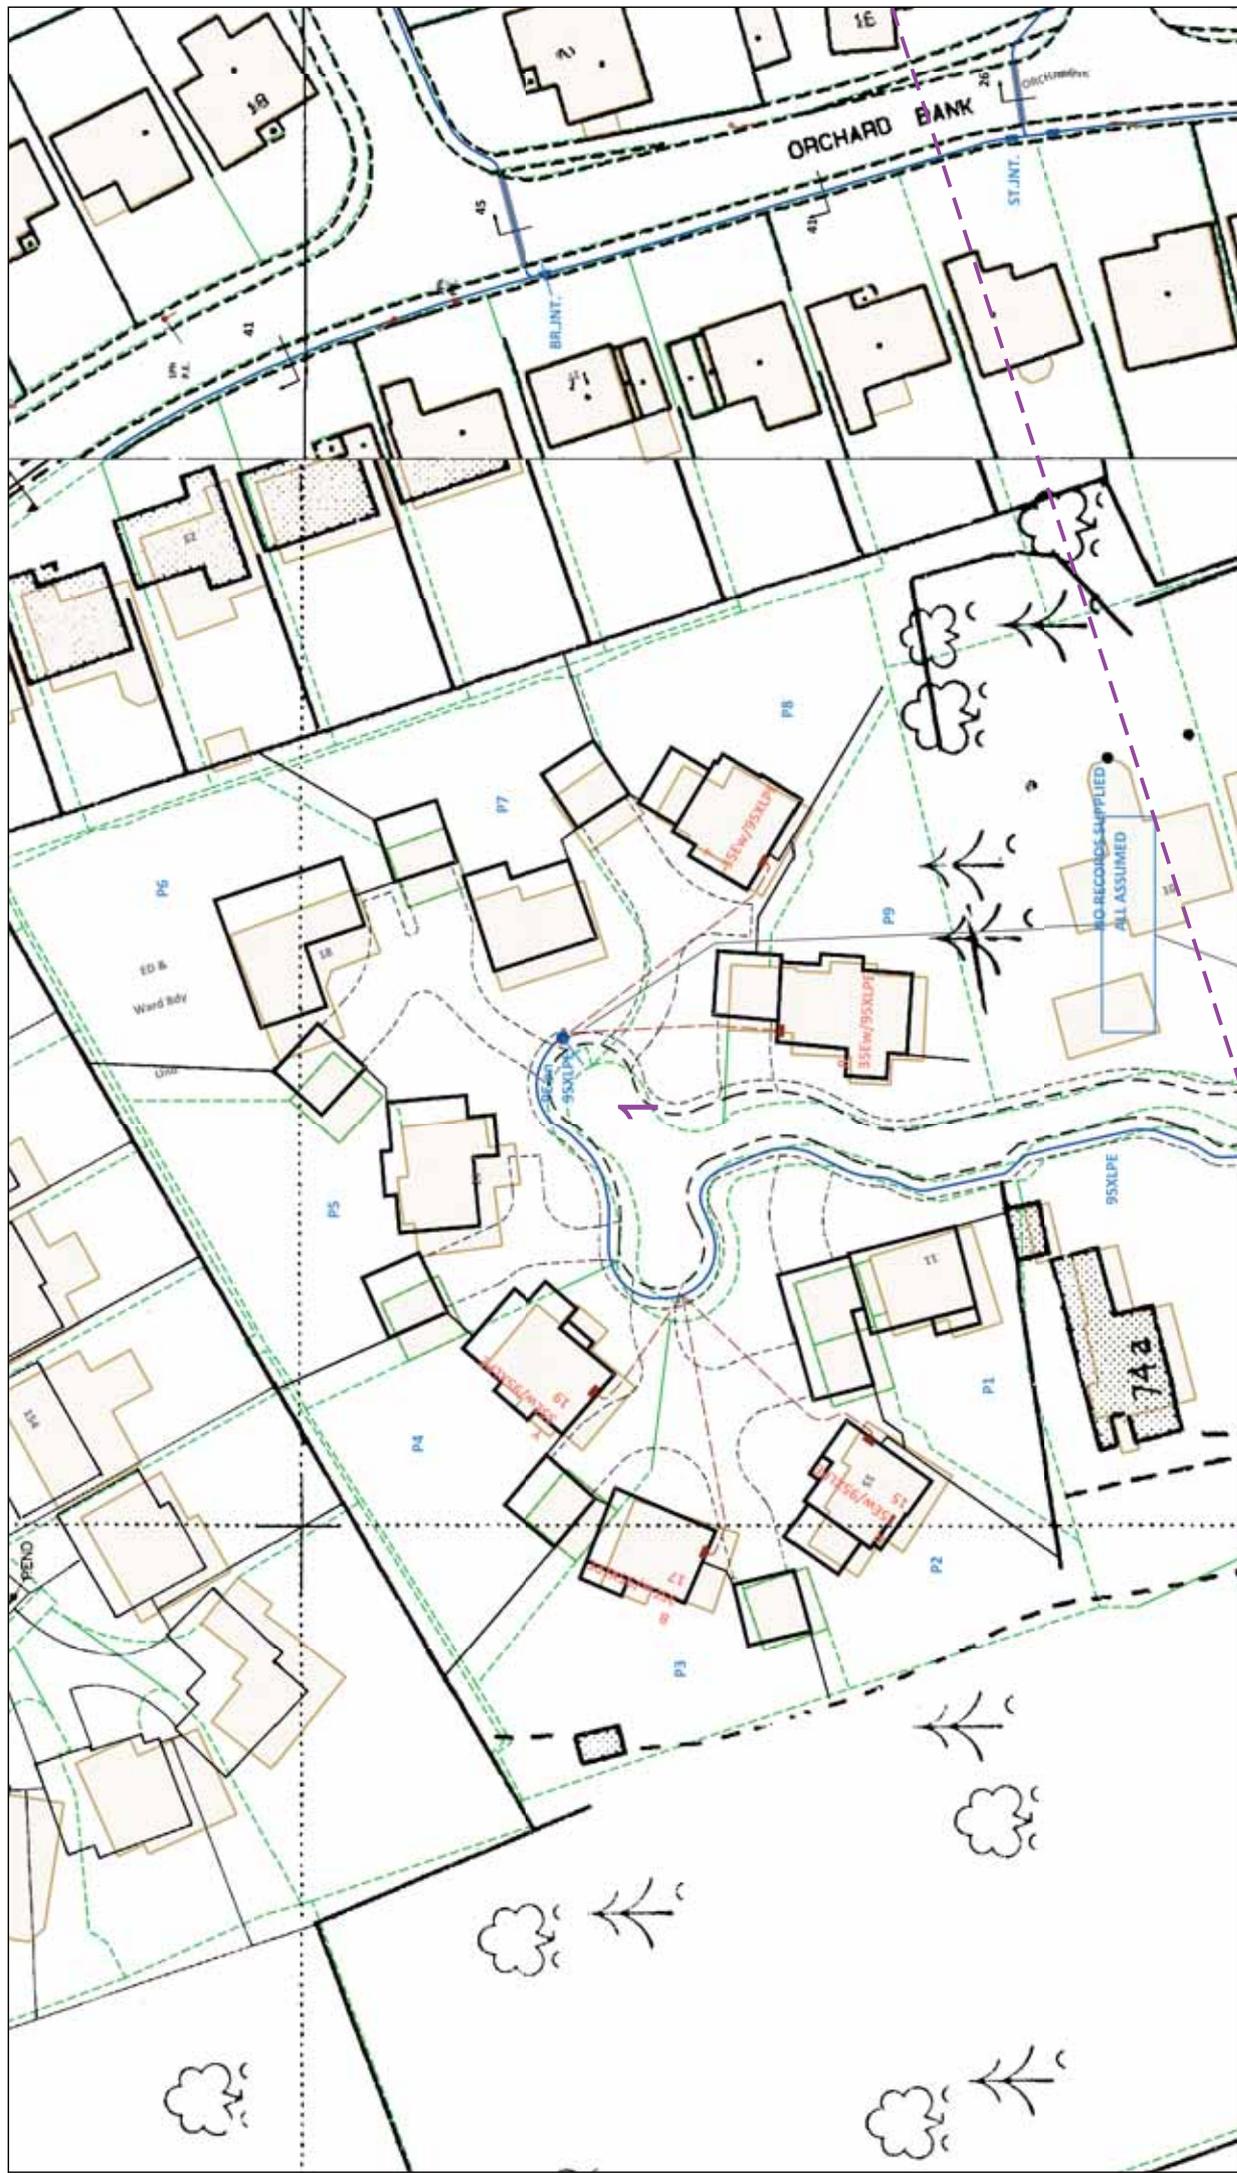

If given a reasonable period of prior notice UK Power Networks will attend on site without charge to advise how and where "goal posts" should be erected. If you wish to use this service, in the first instance please telephone: 0845 6014516 between 08:30 and 17:00 Monday to Friday.

10. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.
11. If in carrying out work on land in, on, under or over which is installed an electric line and/or electrical plant that belongs to UK Power Networks you and/or anyone working on your behalf damages (however slightly) that apparatus you must inform immediately UK Power Networks by our emergency 24 hour three digit telephone number **105** providing;
- your name, address and telephone number;
  - the date, time and place at which such damage was caused;
  - a description of the electric line and/or electrical plant to which damage was caused;
  - the name of the person whom it appears to you is responsible for that damage;
  - the nature of the damage.
12. The expression "UK Power Networks" includes UK Power Networks (EPN) plc, UK Power Networks (LPN) plc, UK Power Networks (SEPN) plc, UK Power Networks and any of their successors and predecessors in title.

	 <p>ALWAYS LOOK UP BEFORE YOU START WORK TO IDENTIFY OVERHEAD LINES Guidance note G55</p>
	<p>IF IN DOUBT - ASK! PHONE 0800 056 5866 EMERGENCY - If you are in doubt call the phone 0800 783 8838 (24hrs) URGENTLY</p>
<p>The quality and accuracy of any print will depend on your printer, your computer and its print settings. Measurements scaled from this plan may not match measurements between the same points on the ground.</p>	
<p>1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk. 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person, or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential loss or damage whatsoever. 3. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the UK Power Networks. 4. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.</p>	
<p>This plan must be used with the attached 'Symbols' document.</p> <p>Date Requested: 28/02/2018 Job Reference: 12327806 Site Location: 616921 312784 Requested by: Mr Duncan Phillips Your Scheme/Reference: 48749</p> <p>Scale: 1:3587 (When plotted at A3)</p>	<p>1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed. 2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools. 3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined. 4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc. 5. All cables must be treated as being live unless proved otherwise by UK Power Networks. 6. Digging near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes. 7. Please be aware that electric cables/lines belonging to other owners of licensed electricity distribution systems may be present and it is your responsibility to identify their location.</p>

1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed.  
 2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.  
 3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.  
 4. It must be assumed that there is a service cable into each property, lamp, column and street sign, etc.  
 5. All cables must be treated as being live unless proved otherwise by Power Networks.  
 6. Plans must be assumed to be current as of the date of issue. Plans issued more than 3 months after the issue date for excavation purposes.  
 7. Please be aware that electric cables/lines belonging to other owners of licensed electricity distribution systems may be present and it is your responsibility to identify their location.

This plan must be used with the attached 'Symbols' document.

The quality and accuracy of any print will depend on your printer, your computer and its print settings. Measurements scaled from this plan may not match measurements between the same points on the ground.

**Dig Sites**    **Area:**    **Line:**

0    25    50    metres

This plan must be used with the attached 'Symbols' document.

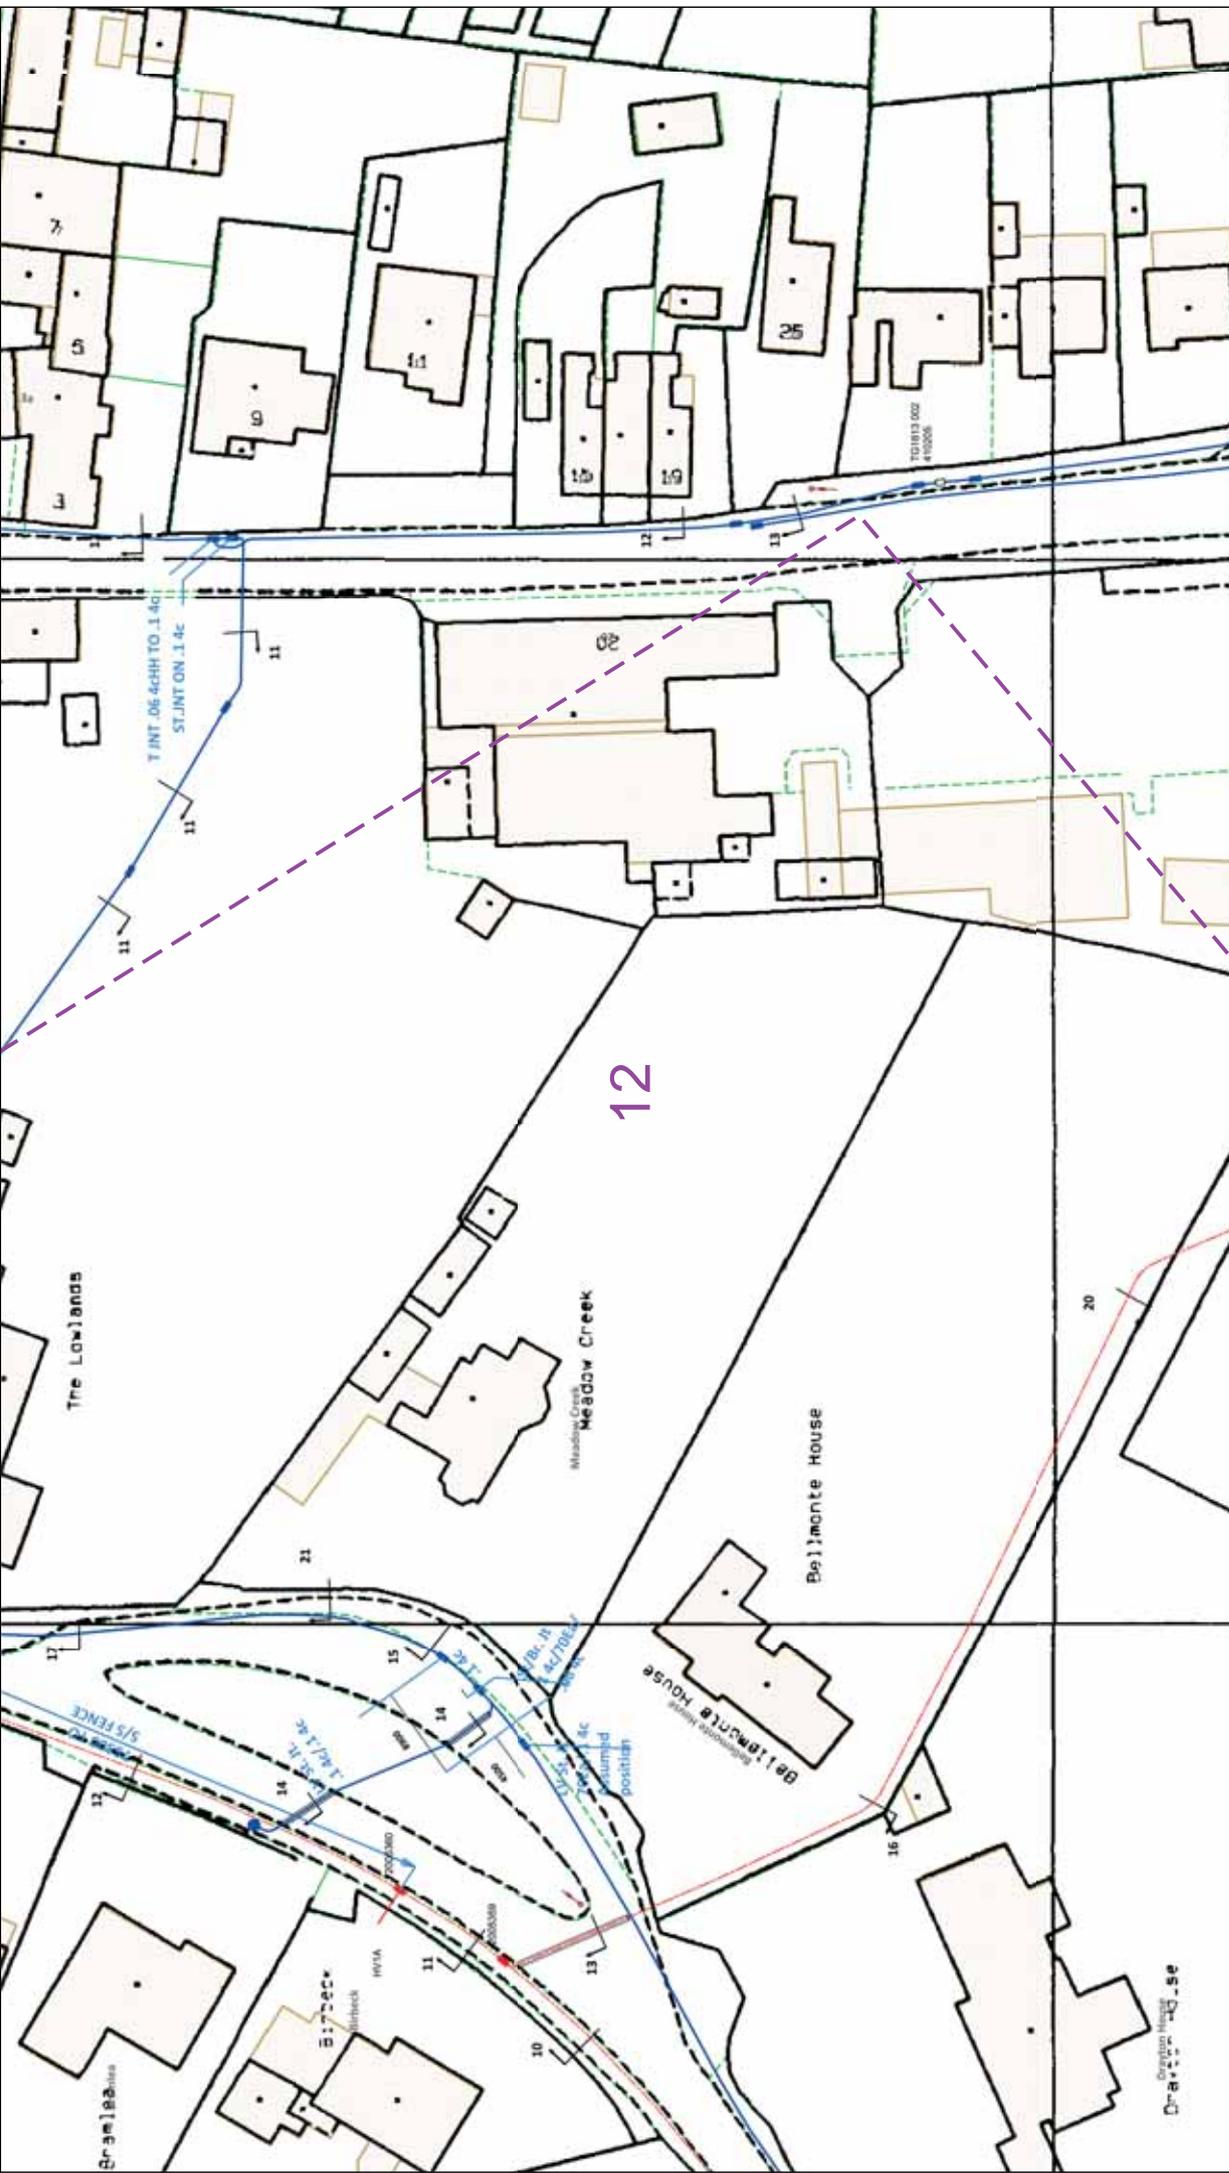

Date Requested: 28/02/2018  
 Job Reference: 12327806  
 Site Location: 616821 312784  
 Requested by: Mr Duncaan Phillips  
 Your Scheme/Reference: 48749  
 Scale: 1:500 (When plotted at A3)

1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed.
2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.
3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.
4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc.
5. All cables must be treated as being live unless proved otherwise by Power Networks.
6. Digging near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes.
7. Please be aware that electric cables/lines belonging to other owners of licensed electricity distribution systems may be present and it is your responsibility to identify their location.

1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk.  
 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person, or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use or any special or consequential loss or damage whatsoever).  
 4. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the fee to a third party.  
 5. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.

 2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.  
 3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.  
 4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc.  
 5. All cables must be treated as being live unless proved otherwise by UK Power Networks.  
 6. The information provided must be given to all people working near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes.  
 7. Pipework aware that electric cables (those belonging to other owners of licensed electricity distribution systems) may be present and it is your responsibility to identify their location.

1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk.  
 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person.  
 3. Subject to paragraph 2 UK Power Networks has no liability to you in contract, in tort (including negligence), for breach of statutory duty or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential top of damage whatsoever.  
 4. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the sender of the letter.  
 5. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.

# See Supplemental Diagram TG1713SEA for Cross-Section 23 details

1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed.  
 2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.  
 3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.  
 4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc.  
 5. All cables must be treated as being live unless proved otherwise by UK Power Networks.  
 6. The information provided must be given to all people working near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes.  
 7. Pipework aware that electric cables (those belonging to other owners of licensed electricity distribution systems) may be present and it is your responsibility to identify their location.

1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk.  
 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person.  
 3. Subject to paragraph 2 UK Power Networks has no liability to you in contract, in tort (including negligence), for breach of statutory duty or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential loss or damage whatsoever.  
 4. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the sender of the letter.  
 5. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.

# See Supplemental Diagram TG1713SWA for Cross-Section 12 details

1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed.  
 2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.  
 3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.  
 4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc.  
 5. All cables must be treated as being live unless proved otherwise by UK Power Networks.  
 6. The information provided must be given to all people working near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes.  
 7. Pipework aware, that electric cables (lines belonging to other owners of licensed electricity distribution systems may be present and it is your responsibility to identify their location.

1. UK Power Networks does not warrant that the information provided to you is correct. You rely upon it at your own risk.  
 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person.  
 3. Subject to paragraph 2 UK Power Networks has no liability to you in contract, in tort (including negligence), for breach of statutory duty or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential top of damage whatsoever.  
 4. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the sender of the letter.  
 5. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.

 2. UK Power Networks does not exclude or limit its liability if it causes the death of any persons or causes personal injury to a person.  
 3. Subject to paragraph 2 UK Power Networks has no liability to you in contract, in tort (including negligence), for breach of statutory duty or otherwise for any loss, damage, cost, claims, demands, or expenses that you or any third party may suffer or incur as a result of using the information provided whether for physical damage to property or for any economic loss (including without limitation loss of profit, loss of opportunity, loss of savings, loss of goodwill, loss of business, loss of use) or any special or consequential loss or damage whatsoever.  
 4. This plan has been provided to you on the basis of the terms of use set out in the covering letter that accompanies this plan. If you do not accept and/or do not understand the terms of use set out in the covering letter you must not use the plan and must return it to the sender of the letter.  
 5. You are responsible for the security of the information provided to you. It must not be given, sold or made available upon payment of a fee to a third party.

IF IN DOUBT - ASK! PHONE  
 0800 05 5614  
 EMERGENCY - If you damage  
 a cable or line  
 Phone 0800 78 0026 (2-8-11)  
 UNLITLY

ALWAYS LOOK UP BEFORE  
 WORKING NEAR OVERHEAD  
 EQUIPMENT  
 Refer to HSE Guidance note GS6

Maps produced at 1:2500 scale are GeoSchematics which show LV main cables and LV distribution cables. Refer to the 1:500 records to determine the location of all known underground plant and equipment.

# See Supplemental Diagram TG1813NWB for Cross-Section 1 details

<p>1. The position of the apparatus shown on this drawing is believed to be correct but the original landmarks may have been altered since the apparatus was installed.</p> <p>2. The exact position of the apparatus should be verified - use approved cable avoidance tools prior to excavation using suitable hand tools.</p> <p>3. It is essential that trial holes are carefully made avoiding the use of mechanical tools or picks until the exact location of all the cables have been determined.</p> <p>4. It must be assumed that there is a service cable into each property, lamp column and street sign, etc.</p> <p>5. All cables must be treated as being live unless proved otherwise by UK Power Networks.</p> <p>6. The information provided must be given to all people working near UK Power Networks plant and equipment. Do not use plans more than 3 months after the issue date for excavation purposes.</p> <p>7. Pipework, aerial, that electric cables (lines belonging to other owners of licensed electricity distribution systems) may be present and it is your responsibility to identify their location.</p>	<p>1. # Network Records NetMAP Symbols Booklet - East of England

This symbol booklet is intended as a general guide only - some local variations of these symbols may be found.

**Version 1.2**

Released October 2010

Always check with your local Network Records office or the UK Power Networks server to ensure that you are using the most up to date copy of this booklet - Tel: 08000 565866.

## Index:-

Page no:	Contents:
1	Guidance notes.
2	The area covered by this guide.
3	<u>1:500 view</u>
4	Scenery.
7	Scenery ( <b>UK Power Networks use only</b> ).
8	Primary distribution cables (EHV).
9	Secondary distribution cables (HV/LV).
10	Service cables/terminations.
11	Cable ducts.
13	EHV/HV/LV sites.
14	Mains joints.
15	Service joints.
17	Cross sections.
	Common abbreviations/terminology ( <b>all views</b> ).
19	<u>1:2500 (LV) &amp; 1:10000 (HV) network views</u> ( <b>UK Power Networks use only</b> ).
20	General.
22	1:2500 scale LV network.
	1:10000 scale HV network.
23	<u>LV network diagram view</u> ( <b>UK Power Networks use only</b> ).
24	Overhead lines.
25	Underground cables.
26	Joints.
	Substations/pole transformers.

## Guidance notes.

### **Important notice:**

If you do not understand the NetMAP record that you are using, please contact the UK Power Networks Network Records team for guidance  
Tel: **08000 565866.**

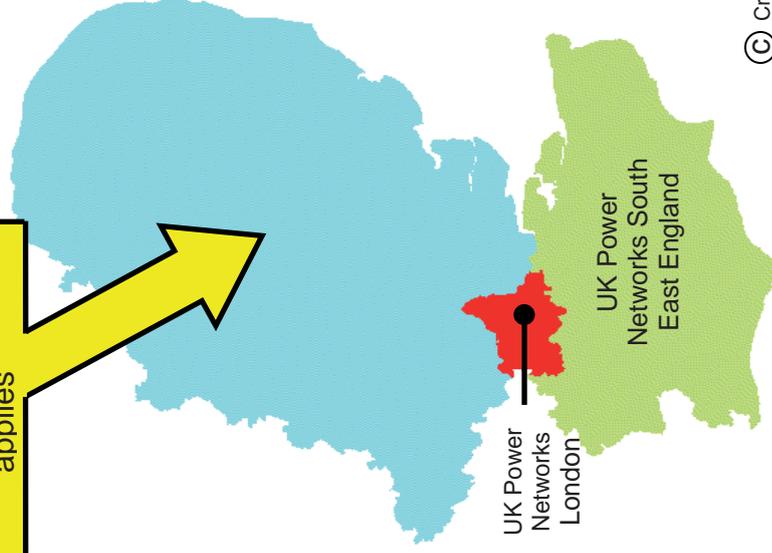

- The position of apparatus shown on NetMAP is believed to be correct, but the original landmarks may have altered since the apparatus was installed.
- It must be assumed that there is at least one service to each property, lamp column, street sign etc.
- All cables must be treated as live, unless proven otherwise by an authorised UK Power Networks representative.
- Third party cables are not usually shown. In cases of doubt, please telephone 08000 565866.
- When two or more maps are supplied for the same area, the maps must be read in conjunction with each other and with this symbol document.
- All LV cables are assumed to be 4 core, and all HV cables assumed to be 3 core unless otherwise stated.

	Not applicable	Historical - Scheduled Monuments (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Historical - Parks and Gardens (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Historical - Areas of Archaeological Potential (AAP) (only visible to E UK Power Networks and their immediate contractors)
	Not applicable	Nature - Ramsar Wetlands of International Importance (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Nature - Special Area of Conservation (SAC) (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Nature - Special Protected Area (SPA) (only visible to UK Power Networks and their immediate contractors)
		Nature - Site of Special and Scientific Interest (SSSI) (only visible to UK Power Networks and their immediate contractors)

section continued on next page

Scenery for UK Power Networks use only - boxed in red		
NetMAP system	Scanned image	Description
	Not applicable	Nature - Local Nature Reserve (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Nature - National Nature Reserve (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Nature - Area of Outstanding Natural Beauty (AONB) (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Nature - National Park (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Fluid filled cables - very high sensitivity (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Fluid filled cables - high sensitivity (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Fluid filled cables - medium sensitivity (only visible to UK Power Networks and their immediate contractors)
	Not applicable	Fluid filled cables - low sensitivity (only visible to UK Power Networks and their immediate contractors)

Primary distribution cables (1:500 view)		
NetMAP system	Scanned image	Description
		Over 33kV and up to 132kV
		Over 11kV and up to 33kV

Secondary distribution cables (1:500 view)		
NetMAP system	Scanned image	Description
		Over 230/400V and up to 11kV (HV) cable route
		230/400V (LV) cable route
		Pilot cable route
<p>(Only shown this way if independent from HV cable route)</p> <p>Abandoned cables are shown and labelled as such when applicable</p>		

Service cables and terminations (1:500 view)		
NetMAP system	Scanned image	Description
		<p>3 phase service with termination</p> <p>3 phase service with termination (unknown route)</p> <p>3 phase service with multi-head termination</p> <p>Single phase service with termination</p> <p>Single phase service with termination (route unknown)</p> <p>Street lighting cable and termination</p>

Cable ducts (1:500 view)		
NetMAP system	Scanned image	Description
		<p>Empty duct</p> <p>Cable(s) in duct(s)</p> <p>Cable(s) in duct(s) (on some raster maps)</p> <p>Multiple cables in ducts</p> <p>Multiple cables in ducts (on some raster maps)</p>

### EHV, HV and LV sites (1:500 view)

NetMAP system	Scanned image	Description
COLCHESTER GRID 	COLCHESTER GRID 	Primary substation
HIGH STREET 	HIGH STREET  HIGH STREET 	Secondary substation
		Pad mounted substation
		Link box – 2 way
		Link box – 4 way (6 way etc shown similarly)
		Feeder pillar – 4 way (6 way etc shown similarly)
CHURCH RD 	CHURCH RD 	Pole transformer
		Poles on underground records
		H pole, any voltage
		Service turret (solid type)

section continued on next page

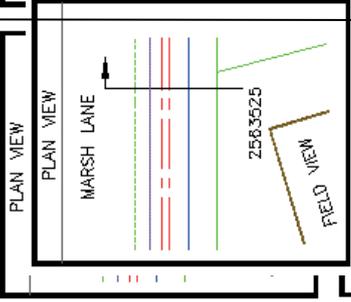

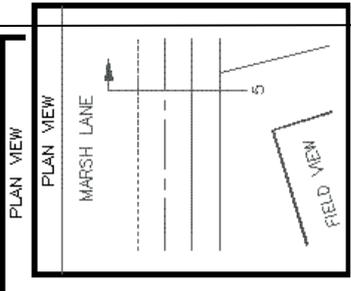

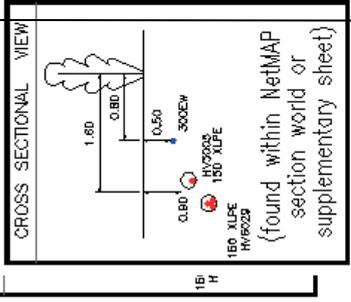

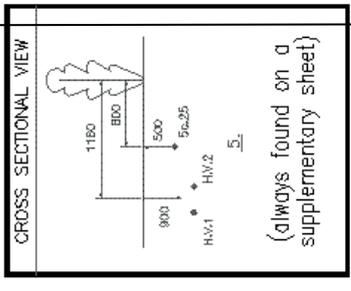

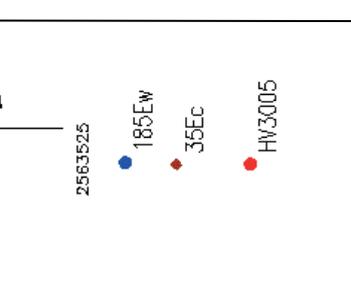

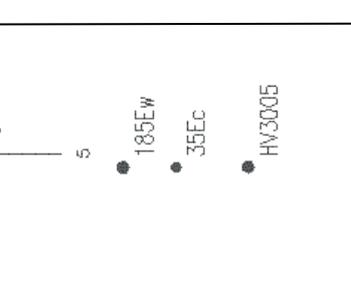

### EHV, HV and LV sites continued (1:500 view)

NetMAP system	Scanned image	Description
No NetMAP equivalent  CAUTION Missing Information 	  No equivalent	Service turret (with link facility on LV main)  Missing data in or near this location
Contaminated Land refer to SHE 01 016 	Not applicable	Contaminated land reference

Mains joints (1:500 view)		
NetMAP system	Scanned image	Description
	(voltage indicated by colour/line-style) 	Straight joint Crutch joint Straight crutch joint Pot end Pot end – on one of several cables – single line representation Branch joint/pot end – (humpy back joint, back to back joint, bull nose joint or stub joint) Sleeve repair or repair joint Cut end Capped end Tee joint Sicame joint box
		NetMAP/vector only

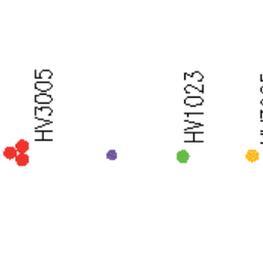

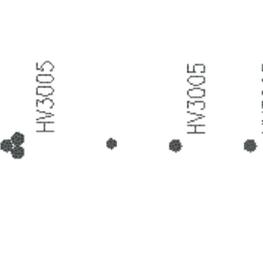

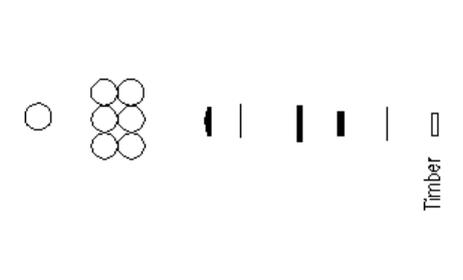

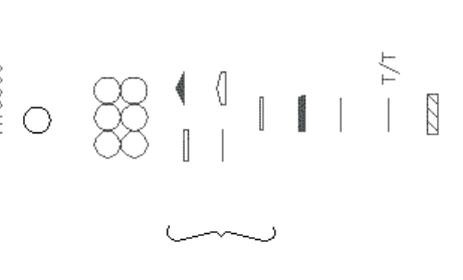

Service joints (1:500 view)		
NetMAP system	Scanned image	Description
		Please note that 3 phase services are shown blue, and single phase services are shown brown Straight joint Service joint to main Pot end

### Cross sections (1:500 view)

NetMAP system	Scanned image	Description
		<p>Single line representational plan view with NetMAP equivalent (please note the use of separate line for each voltage on the raster/MMS data)</p>
		<p>Cross sectional view of above</p>
		<p>Section arrow with old/new numbering system – points in direction section is viewed</p> <p>LV/3 phase service cable Single phase service cable with size annotation HV cable – 3 core with route number annotation</p>

section continued on next page

### Cross sections continued (1:500 view)

NetMAP system	Scanned image	Description
		<p>HV cable – modern EPR, Plam and Triplex with route number annotation</p> <p>Pilot cable</p> <p>33kV cable</p> <p>132kV cable</p> <p>Single duct</p> <p>6 way duct formation – irrespective of duct type and material, all are displayed similarly</p> <p>Protective slab</p> <p>Tiles</p> <p>Concrete slabs</p> <p>33kV fibre warning board</p> <p>Steel plate</p> <p>Plastic tile tape</p> <p>Timber</p>
		

Common abbreviations and terminology (all views)		
Abbrev.	Description	Abbrev. Description
1c	Single core	Meter/main fuse position
1ph	Single phase	Triplex (copper)
2c	Two core	Direct earth
3c	Three core	Double steel tape armoured
3ph	Three phase	Alplex cable
ABC	Aerial bunched (bundled) conductor (modern LV overhead line)	Earth fault passage indicator
ABI	Air break isolator (no fuses)	Extra high voltage (11,001 Volts and over)
ABSD	Air break switch disconnecter	Earth leakage circuit breaker
ACCS	Aluminium concentric copper sheathed	Earth leakage trip
Al	Aluminium	Ethylene propylene rubber
AR	Auto recloser	Waveform cable
ASL	Automatic sectionalising links	Earthenware duct or earth wire
ax	Triplex (aluminium)	LV or HV cable fed by or feeding a substation
	2 x 22mm AL PVC (example) Duplex	Fuse gear
	3 x 22mm AL PVC (example) Triplex	Feeder pillar
CB	Circuit breaker	Fibreglass substation
c/c	Concentric cores	Gas vacuum recloser or pole mounted circuit breaker
ccc	Compact covered conductor	High voltage (1,001 – 11,000 Volts incl)
CCT	Circuit	Modern plastic cable with mixed conductor material (Al/Cu)
CNE	Combined neutral and earth	Electrically protective material surrounding a conductor
Cross phased	The core colour may be different to originating transformer phasing	Porcelain or glass overhead line support (on poles)
CS	Consac	Instrument traced cable or ITC
CSE	Cable sheath earth	- cable traced electronically using Cable Avoidance Tool (CAT) or similar
Cu	Copper	

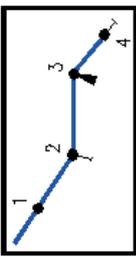

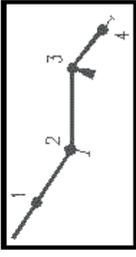

section continued on next page

Common abbreviations and terminology (all views)		
Abbrev.	Description	Abbrev. Description
Jumper	Connecting lead between open points, section points and overhead plant	PICAS
kV	Kilovolt (or 1,000 Volts) – unit of electrical pressure	PILC
kW	Kilowatt (1,000 Watts) – unit of electrical power	PILSTA
kVA	Kilovolt Amps or power	PL
Link box or LB	Means of connecting LV feeders together using links or fuses	PME
LSF	Low smoke & fume	PMT
LV	Low voltage (up to 1,000 Volts incl)	PMR
LV Pillar	Low voltage fuse distribution board	PT
Neutral	Return path of live cable	PVC
O/H or OHL	Overhead line	RMU
OYS	Oil filled pole mounted sectionaliser	RN
OYT	Oil filled pole mounted recloser	s/c
PC400	Pole mounted LV fuse unit	S/L
PE	Pot end or potential end – joint on cable end	S/S
Phase	Usually the core colour of a cable (caution – may be cross phased) – Red, Yellow, Blue on old cables, or L1, L2, L3 on new cables, for example	STA
		SWA
		T1 or T2 etc
		T/F or TX
		Volts
		Watts
		XLPE

# 1:2500 & 1:10000 view - overhead networks - for UK Power Networks use only - boxed in red

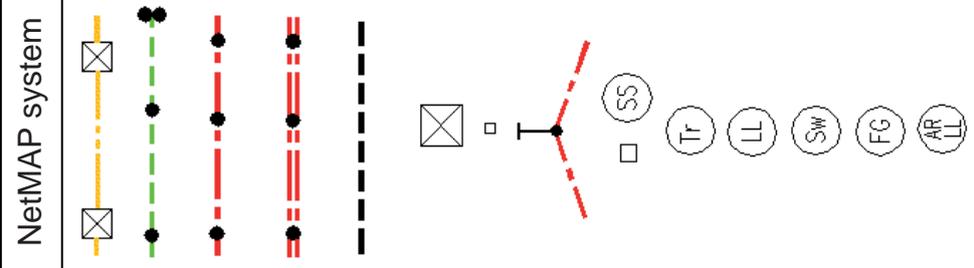

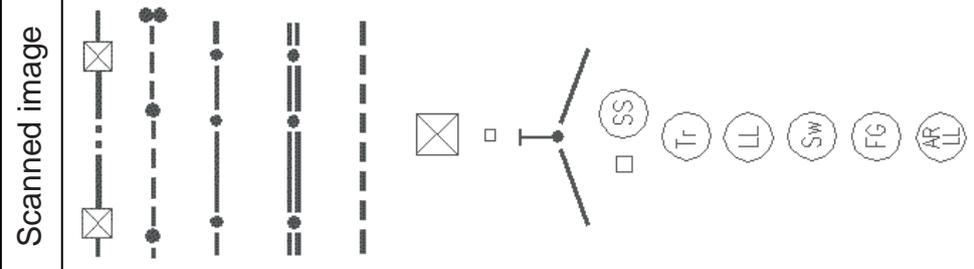

## General

NetMAP system	Scanned image	Description
		H pole
		Pole

1:2500 scale LV network		
NetMAP system	Scanned image	Description
No NetMAP equivalent		132kV cable route
No NetMAP equivalent		33/22kV cable route
No NetMAP equivalent		11kV underground cable
		132kV overhead line
		33kV overhead line – dots mark pole position
		11kV overhead line – dots mark pole position
		Dual construction – dots mark pole position
		LV overhead line – dots mark pole position
		LV underground cable
		Pole and stay
		Pole and strut
		Voltage regulator
		Static balancer
		Example of struts and stays
		Flying stay
		Earthed pole in PME system
		Pole number
		Ground type substation
		Section pole
		Street light

	<p>Intermediate pole</p> <p>Section pole</p> <p>Overhead fuse</p>

**section continued on next page**

# Substations/pole transformers cont'd (LV network diagram view)

NetMAP system	Description
 <p>Overview – the purple lines through the section poles are pole links – these indicate how the network is linked together</p> <p>2 way link box</p> <p>3 way link box</p> <p>4 way link box</p> <p>4 way double busbar link box</p> <p>4 way BICC link box</p> <p>5 way link box</p> <p>6 way link box</p> <p>6 way double busbar link box</p> <p>A two way link box with identification number, connected to a cable with an open point</p> <p>Feeder pillars – these range from 2 ways through to 9 ways – a 9 way and a 2 way are shown as examples</p> 	

**Think**  
before you...

**THINK . . .**

**Every year people are killed or seriously injured in incidents involving underground electricity cables.**

**THE DANGER**

Underground cables carry a powerful electrical charge which can be conducted through machinery and equipment with fatal consequences. Anyone working close to live underground cables should take time to read this simple safety leaflet and identify the precautions they should be taking.

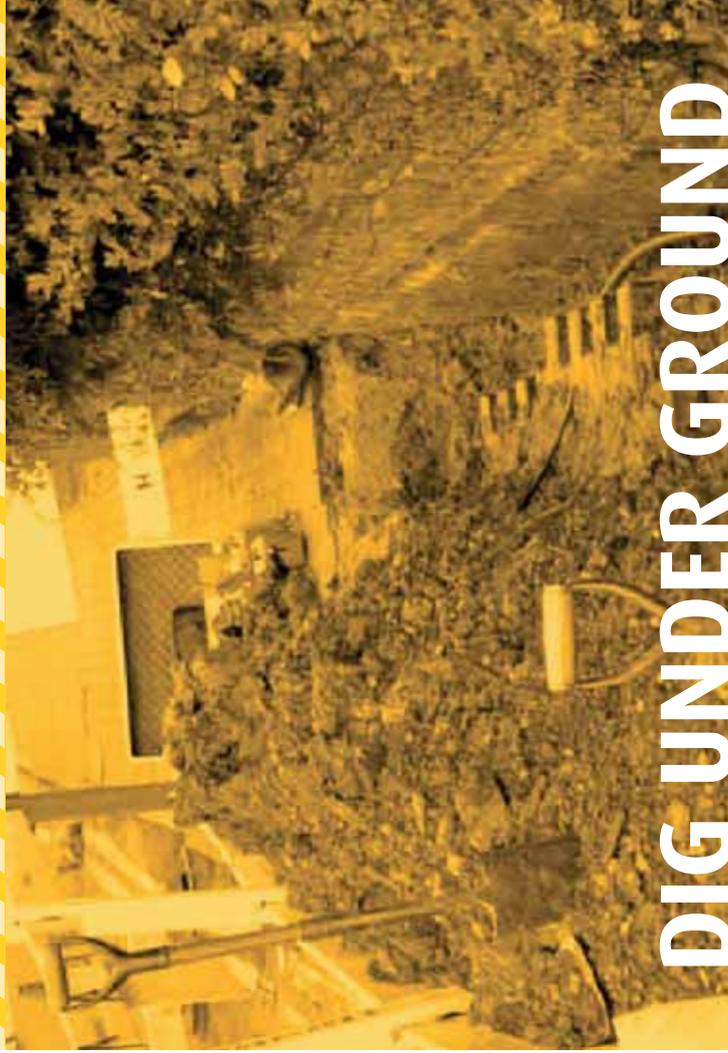

**WHO IS AT RISK?**

People in construction, demolition, agriculture, infrastructure or anywhere else where excavation is taking place. That is why it is vital everyone working on or visiting a working site is fully aware of the hazards and the steps that must be taken to avoid them.

**HOW INCIDENTS HAPPEN**

Sadly, accidents where excavators, breakers or other tools make contact with power cables are not uncommon. Where equipment or machinery is used near underground cables the risk must be considered and controlled in the interests of everyone.

**DIG UNDER GROUND**

## THINK AHEAD

Get the basics right. Familiarise yourself with the site. Mark the route of underground cables running across the site on all plans circulated to staff. Find out if the work could be carried out away from the cables, or avoided all together.

UK Power Networks is committed to safety and actively encourages anyone undertaking work to contact us in advance for advice and free cable locating maps.

These will help you avoid our underground cables during your work, which is vital for your safety as well as ensuring we can provide a reliable supply of electricity.

For free maps and advice call **0800 056 5866** or write to:

Plan Provision

UK Power Networks

Fore Hamlet

Ipswich

IP3 8AA

[plans@ukpowernetworks.co.uk](mailto:plans@ukpowernetworks.co.uk)

We can advise you on what steps to take if essential work is necessary close to underground cables and help ensure safe working practises are implemented.

Good management reduces the risk of accidents. With proper planning and control, workers should not come into contact with underground cables.

If excavation work forms a part of your day-to-day activities obtain a copy of the Health & Safety Executive's Guidance Note "Avoiding Danger from Underground Services" HSG47, which is free to download from the HSE's website - [www.hse.gov.uk/pubns/priced/hsg47.pdf](http://www.hse.gov.uk/pubns/priced/hsg47.pdf)

## WHAT TO DO

- **Have cable drawings and records on site**, know how to read them and check them before starting work. Be aware that not all cables may be shown on the records.
- **Look around for anything in the vicinity** that would have an electricity service, such as street lights, CCTV cameras, phone boxes, etc. as well as the more obvious things like houses and industrial units.
- **Always** use a cable avoidance tool (CAT) to survey the entire site before digging commences. Once found, mark cable positions with spray paint or similar. Do not forget to use encroachment lines as well.
- **Dig trial holes**, by hand, alongside the indicated route of the cables(s).
- Use spades and shovels with **insulated handles** in preference to forks and picks.
- **Make sure everyone** on site, including visitors, **understand the risks**.
- If there is a **cable encased in concrete** contact **UK Power Networks to agree a safe method of work**. This may mean making the cable dead.
- Before demolishing a building make sure that supplies are disconnected, preferably well clear of the work area. For guidance on how to arrange a disconnection visit [www.ukpowernetworks.co.uk](http://www.ukpowernetworks.co.uk) – Our Services
- Have the **emergency contact telephone number** easily available on site.

## WHAT NOT TO DO

- Never allow anyone near a damaged or suspected damaged cable or joint.
- Do not handle or attempt to alter the position of a cable or joint.
- Never assume that cables run in straight lines, they may be deflected around underground obstacles.
- Do not use mechanical excavator or powered digging tool within the vicinity of known cables.
- Never knock a road pin, or forcibly throw a spiked digging tool into the ground, without checking what is below the surface.

## IF A CABLE IS DAMAGED

Notify UK Power Networks immediately:

London 0800 028 0247  
East of England 0800 783 8838  
South East 0800 783 8866

**Call the emergency services if anyone is injured.** Anyone who has received an electrical shock should go to hospital as damage may have occurred to the heart.

Always **treat the cable(s) as live** even if they are not sparking. Cables can be re-energised at any time without warning.

**Never remove anything** that is stuck **in a cable**.

**Keep everyone well away** from the area of the damage.

**Do NOT** attempt to remove anything that is in contact with the cable.

PLAN IT OUT

**CHECK IT OUT BEFORE  
YOU DIG UNDER GROUND**

 **DANGER  
OF DEATH**

THINK BEFORE  
YOU DIG

Call the network operator

email: [nnhc@openreach.co.uk](mailto:nnhc@openreach.co.uk)

Date of issue shown on map

Dear Customer,

**NR & SW ACT 1991 – PROPOSED WORKS AT:**

Prior to commencement of work: for free onsite guidance and accurate up to date location of BT plant please contact our Plant Protection Service by the following methods

***Email Dial before you dig*** [CBYD@openreach.co.uk](mailto:CBYD@openreach.co.uk)

***Visit the website*** [www.openreach.co.uk/cbyd](http://www.openreach.co.uk/cbyd)

Thank you for your request of                      describing the above proposals.

Enclosed are copies of our drawing marked up to show the approximate locations of BT apparatus which is present in the immediate vicinity of your works. It is intended for general guidance only. No guarantee is given of its accuracy.

It should not be relied upon in the event of excavations or other works made near to British Telecommunications plc apparatus which may exist at various depths and may deviate from the marked route.

To avoid damage it is recommended that mechanical excavators or borers are not used within 600mm of British Telecommunications plc plant. If scaffolding is erected, please ensure that our equipment is not enclosed, blocked, covered or otherwise obstructed by the scaffolding.

In the event of BT apparatus being in the area of works we recommend that your plant/vehicle crossing is either resited, or apply for a budget estimate by submitting detailed plans to the above address, these will be forwarded to the appropriate department for their comments.

Please ensure you quote our reference on any future correspondence.

Yours faithfully,

## Openreach Plant Maps Requested

NewSite Office (addresses can be found on [the New Developments contact page](#))

**Dear Sir/Madam,**

You have downloaded copies of our drawings marked up to show the approximate location of Openreach apparatus, which is present in the immediate vicinity of your works. It is intended for general guidance only. No guarantee is given of its accuracy. It should not be relied upon in the event of excavations or other works made near to Openreach apparatus, which may, exist at various depths and may deviate, from the marked route.

To avoid damage it is recommended that mechanical excavators or borers are not used within 600mm of Openreach plant. Please ensure that our equipment is not enclosed, blocked, covered or otherwise obstructed by your plant. In the event of clearance not being adequate we anticipate that your plant is either resited, or an order is placed with Openreach for rearrangements of its plant. If there are any difficulties with the Map please email [cbyd@openreach.co.uk](mailto:cbyd@openreach.co.uk)

---

Please contact our Network Protection Service by Email on [cbyd@openreach.co.uk](mailto:cbyd@openreach.co.uk) giving four calendar weeks notice of your commencement date. This will provide you with on-site advice and a check of location for any Openreach apparatus.

---

Further to this, I hope the following points will assist you at the new development: -

Openreach has a licence obligation to provide service to any end customer requiring a connection. A Developer would not normally be charged for provision of service, our standard connection charges would apply to the end user when orders are placed with the communication provider of choice. However, should a Developer insist on an underground service in an area where Openreach plant is provided overhead, charges may be incurred.

When the Developer has obtained contract and planning permission Openreach would request a 'Clean', scaled Site Layout, Location Map and a covering letter be sent to the relevant newSite Office. We would particularly request that you give details of your programmed site start date and likely first occupancy date where possible. To obtain contact details of the newSite office covering the development area click on the URL below.

<http://www.newdevelopments-openreach.co.uk/ContactUs.aspx>

Where a development affects existing Openreach apparatus in the public highway, the cost of any necessary protection or diversionary works must be borne by the Developer. In this case where a budget estimate is required a Site Plan, Location Map and a covering letter should be forwarded to the Repayments Project Office. Please visit [www.openreach.co.uk/alterationscontacts](http://www.openreach.co.uk/alterationscontacts) for contact details of the Repayments Office covering the development area.

Yours faithfully,

## Openreach newSites
